PERSONAL STATEMENT

As an Acquisition Product Manager at Bitso, I am reinventing crypto by creating user-focused products that are easier and more intuitive to use. I have a CSPO® certification and a strong background in UX/UI design and frontend development, which enable me to deliver impactful solutions that meet user needs and business goals.

Working on various projects from scratch in different roles, such as product designer, frontend developer, and product manager, gave me a holistic view in the digital products. I focus my work on users needs and creating the journey from there. When it comes to building products, my thing is using data that exposes a problem or opportunity to solve real user problems and create products that simplify people's daily lives and empower them to access the crypto revolution.

Working in the digital ecosystem for 11 years, I was able to gather a wide range of tools, tactics and experience. Building trust and equipping my teammates to develop game-changing solutions, I've repeatedly proven innovation, customer centricity, drive and motivation.

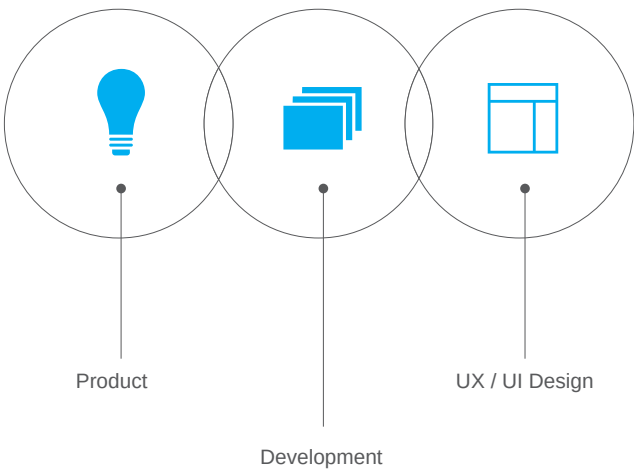

Achieved Remarkable Growth at Bitso

- Led Bitso's product expansion, achieving an annual growth rate of +75%, scaling from 4 million to nearly 7 million users.
- Enhanced the onboarding conversion rate by +262%, increasing from 8% to 29% in just one year.
- Developed a new home screen for an exchange with over 8 million users, driving a 35% increase in product activation.

Achieved Remarkable Growth at Lemon

- Led Lemon's product growth, achieving a remarkable +2500% increase, scaling from 60k to 1.5M users.
- Successfully launched onboarding products for Argentina, Brazil, Mexico, Peru, Colombia, Uruguay, and Ecuador in 6 months, acquiring over 1M users in the first year.
- Enhanced the onboarding conversion rate by +60%, increasing from 50% to 80% within a year.
